

Career Information Center

The most comprehensive job resource available

NEW EDITION

Do you know that the five occupations expected to be the fastest growing from 2004-2014 are home health aide, network systems and data communications analysts, medical assistants, physician assistants and computer software engineers (applications)? Do you know what a photonic engineer is and the outlook for the field? Do you know that the median salary for an anesthesiologist is \$321,686 per year? The answers to questions like these and thousands more can be found in the fully updated ninth edition of Macmillan Reference USA's *Career Information Center*. For the experienced worker, student, guidance counselor or novice job-hunter, *Career Information Center* has been the one-stop resource for questions about every type of occupation for more than 20 years. From construction to Web design, *Career Information Center* provides the most current information available on the job market in the United States and Canada.

Each volume presents the many details involved in the job search and describes specifically what it's like to work at a given job. Entries include job profiles, career issues, sample application letters, resumes, workers' rights and more. How do you land the job you want? What kind of training or certification is required? What will it be like once you get there? Information is presented in tabular and essay format along with additional reading resources and a directory of institutions offering training.

Thirteen volumes cover every career field:

- Agribusiness, Environment and Natural Resources
- Communications and the Arts
- Computers, Business and Office
- Construction
- Consumer, Homemaking and Personal Services
- Engineering, Science, Technology and Social Science
- Health
- Hospitality and Recreation
- Manufacturing
- Marketing and Distribution
- Public and Community Services
- Transportation
- Employment Trends and Master Index

This updated ninth edition features more than 700 job profiles describing more than 3,000 occupations. The 13th volume contains the master index as well as essays on different aspects of employment, including "The American Workforce: 2004-2014," "Employment Opportunities at Home," "Health in the Workplace" and "Trends in Employee Benefits." The set also includes more than 55 new job profiles, including:

- Audiologist
- Cardiac Perfusionist
- Environmental Engineer
- Geriatrician
- Illustrator and Graphic Designer
- Natural Science Manager
- Sales Engineer
- Veterinary Technician
- And many others

FEATURES OF CAREER INFORMATION CENTER:

- Hundreds of updated and new job overviews in a variety of industries
- Quick reference charts and sidebars highlighting current salary range, education and employment outlook for each job profiled
- Consistent format making comparing and contrasting easy
- Volume-specific job summary charts
- General career resources and industry-specific bibliographies
- Directory of career information sources for Canada organized by industry and province
