## Experiment Central

**NEW EDITION** Students, parents and general researchers will find examples of science projects and experiments they can replicate for science fairs and other purposes, as well as suggestions on ways they can design their own project. Step-by-step descriptions of projects are provided. In addition, hints and suggestions are included to enable a student to alter the original experiment or create a completely new one. And, unlike other science experiment resources, student-friendly *Experiment Central* also provides an accessible explanation of the theory behind the experiment.

## Food: In Context

**NEW TITLE** Perfect for high-school students and general researchers, *Food: In Context* examines food in relationship to nutrition, world health issues, agriculture, environmental concerns, current events and political decision-making. Written by experts, this new full-color set covers the historical, political and ethical debates related to food. It also explores how food impacts daily life, trade and commerce, the environment, and health and nutrition. Cross-curricular in nature, *Food: In Context* supports basic and advanced AP curricula in chemistry and biology, as well as Earth science, general physical science, environmental science, health science, history, government and the social sciences.
